Full Stack Developer | Flutter & Django Developer

Ambitious Full Stack Developer with 1 year of hands-on experience in building clean, responsive, and user-friendly **web and mobile applications**. Skilled in developing robust backend systems and smooth frontend interfaces, ensuring efficient performance and seamless user experience.

Experienced in **Django, Python, Flutter, Dart, HTML, CSS, Bootstrap, MySQL, and C++**, with strong capability in API development, database management, UI design, and cross-platform mobile development. Contributed to multiple real-world projects focusing on scalable backend architecture, dynamic UI creation, and optimized application flow. Passionate about learning new technologies, improving performance, and building complete end-to-end solutions.

WORK EXPERIENCE

HTML & CSS: Proficient in creating responsive, user-friendly, and accessible web pages using clean and semantic code. Skilled in implementing layouts, styling, and responsive designs.

Bootstrap: Experienced in developing modern, mobile-first interfaces efficiently using Bootstrap components, grid system, and utility classes.

Git & GitHub: Proficient in version control using Git and collaboration on projects through GitHub, ensuring efficient code management and teamwork.

Django (Python): Hands-on experience in building backend logic, APIs, authentication systems, and database-driven applications using Django. Skilled in creating RESTful APIs, handling models, views, templates, and integrating frontend with backend smoothly.

Flutter & Dart: Experienced in cross-platform mobile app development using Flutter and Dart, focusing on building clean UI, reusable widgets, state management, and optimized app performance for Android and iOS.

MySQL: Skilled in designing and managing databases, writing efficient queries, creating relationships, and integrating MySQL with Django-based applications.

C++: Strong foundation in programming logic, data structures, and object-oriented programming through C++, contributing to problem-solving and system-level understanding.

PROFESSIONAL EXPERIENCE

KICS, Lahore, Pakistan

October 2025 - Present

PHOTA - Pakistan Human Organ Transplant Authority

Developed a **Flutter mobile application** for managing hospital accreditation, organ transplant assessments, and hospital records.

- Built cross-platform mobile interfaces using **Flutter & Dart**, focusing on clean UI and smooth user experience.
- Implemented **JWT Authentication** to ensure secure access to sensitive medical and organizational data.
- Integrated the app with **.NET Core backend services** for data retrieval, submission, and real-time updates.
- Ensured regulatory compliance and collaborated with government officials to refine workflows and data accuracy.
- Utilized **Swagger** for API understanding/documentation and managed project versions through **GitHub**.

KICS, Lahore, Pakistan

July 2025 – September 2025

POS (Point of Sale) Desktop Application

Developed and contributed to a **POS Desktop Application** using **Flutter (desktop frontend)** and **Django (backend)**, focusing on delivering a smooth, fast, and user-friendly sales management system.

- Designed and built clean, responsive, and functional **Flutter desktop UI screens**, ensuring an intuitive workflow for POS operations.
- Implemented **reusable widgets** and optimized layouts to support desktop interactions such as keyboard shortcuts, wide-screen layouts, and multi-window behavior.
- Developed a **mini-CRUD module** using Django REST Framework to manage products, inventory, orders, and user roles with secure API endpoints.
- Integrated the Flutter desktop client with the Django backend, ensuring seamless data flow, real-time updates, and error-free API communication.
- Improved code structure, optimized performance, and followed modern desktop development standards using Flutter.

POS CRM Dashboard (Django + Flutter Desktop Integration)

- Worked as a proactive **Full Stack Developer**, contributing to both the desktop frontend (Flutter) and backend (Django) for CRM and POS functionality.
- Managed and delivered modules independently while coordinating with supervisors and stakeholders for workflow-based improvements.
- Strong hands-on experience with **Flutter Desktop, Dart, Django REST Framework, MySQL**, and API-based UI rendering.
- Focused on building reusable components, improving UI structure, and ensuring efficient performance across the desktop environment.

KICS, Lahore, Pakistan

September 2025 – October 2025

Alwaiz Developers

Worked as a **Flutter Developer**, contributing to the development of a feature-rich mobile application for Alwaiz Company. Focused on creating a smooth, engaging, and secure experience for admin-side users.

- Developed and designed the complete **mobile application UI** using Flutter, ensuring a clean, modern, and user-friendly interface.
- Implemented **subscription plan modules**, allowing administrators to manage plans, restrictions, and user access levels.
- Added **content blocking features** and controlled live links to ensure only authorized users can access sensitive resources.
- Built a secure **login and authentication system** exclusively for admin users to maintain controlled and protected access.
- Integrated a **chatbot feature** to assist users with automated responses, quick support, and real-time guidance within the app.
- Ensured full responsiveness and smooth performance across different screen sizes and devices.
- Collaborated with the backend/API team to ensure seamless data communication and proper workflow integration.
- Focused on writing clean, optimized, and maintainable code for long-term scalability.

NAV TTC Program – Lab Assistant & IT Support (Experience)

February 2026 – May 2026

- Assisted students with software installation, troubleshooting, and technical guidance.
- Supported computer lab management and system maintenance.
- Provided basic IT support and assisted in technical documentation.
- Supported coordination and reporting activities related to training programs.

FYP – AI-Powered E-Commerce Platform

Technologies: Django, PostgreSQL, Python, REST APIs, AI Integration

- Developing a full-stack AI-powered E-Commerce platform using Django and PostgreSQL, focused on scalability, performance, and modern user experience.
- Designed and implemented secure backend architecture, database models, authentication systems, and API-based workflows using Django.
- Integrated PostgreSQL for efficient data management, relational database handling, and optimized query performance.
- Building responsive and user-friendly frontend interfaces with smooth navigation and dynamic product management features.
- Implementing AI-based functionalities such as smart product recommendations, automated customer assistance, and intelligent search/filter systems.
- Working on role-based dashboards for admin and users, including order management, product tracking, and analytics features.
- Developing RESTful APIs for seamless communication between frontend and backend systems.
- Using Git and GitHub for version control, collaboration, and project management.
- Focused on clean architecture, reusable components, and scalable development practices for future enhancements.

Technical Skills

- Frontend: HTML, CSS, Bootstrap
- Backend: Django, Python, Django REST Framework
- Mobile/Desktop Development: Flutter, Dart
- Database: MySQL
- Programming Languages: Python, Dart, C++
- Tools & Platforms: Git, GitHub, Swagger, Postman
- Core Concepts: REST APIs, JWT Authentication, CRUD Operations, Responsive Design

CERTIFICATIONS

- Certificate of Completion: Frontend Developer – KICS Lahore (11/2025)

EDUCATION

NCBA&E

Oct 2022 – Present

- Bachelor of Computer Science (BSCS)
